

KOMATSU 6D125 ENGINE CYLINDER KITS

DSG is proud to announce that we are now developing a new product line for the popular Komatsu 6D125 engine.

This decision to venture into new territory came from the many requests we received from our distributors worldwide.

For over 20 years DSG has worked exclusively on American made diesel and Natural gas engines with our constant focus of precision craftsmanship. This philosophy of quality without compromise will now be brought to the Komatsu line.

DSG, helping You craft the world we live in!

Below you find a first list of the items currently available on this engine:
